I was a participant in last year's FASEB Summer Research Conference at Copper Mountain on "Chromatin and Transcription". This was a truly superb meeting on a topic that I think is rapidly gaining importance and receiving more and more attention. I think a successor meeting in the same format on this subject in 1993 will be very valuable and meet with much interest. I am personally very excited at the idea of coming together with many of the contributors of the previous meeting and getting to know new people in this field which according to my prejudice is rather special.

Dear Alan,

Thanks for the invitation to participate in the 2nd FASEB meeting on "Chromatin and Transcription" in 1993. Given the rapid progress in this field, I think that the meeting will be very timely and exciting, and I look forward to participating.

Best regards,

Fred
